

# The inner disk of young stars: accretion, ejection and planet formation

The Kepler satellite has revealed thousands of planets orbiting within a few 0.1 au's from their host stars. The conference will address the origin of these abundant close-in multi-planetary systems by exploring the environmental conditions that prevailed at the time of their birth within the inner astronomical unit of circumstellar disks. Building on the state-of-the art observations and models of inner planets, disks and outflows, it will address our understanding of inner planet formation and evolution, accretion/ejection processes at the inner disk edge, and star-planet-inner disk interactions.

### **Online application**

The conference will be limited to 100 participants. 28 February 2023: Notification of selected abstracts & Registration opens 15 March 2023: Registration closes

## **Scientific Organizing Committee**

Silvia Alencar (UFMG, Brazil)
Clément Baruteau (IRAP, France)
Jérôme Bouvier, Chair (IPAG, France)
Sylvie Cabrit (Obs. Paris, France)
Gael Chauvin (OCA, France)
Catherine Dougados (IPAG, France)
Suzan Edwards (Smith College, USA)
Carlo Manara (ESO, Germany)
Sean Matt (Univ. Exeter, UK)
Karine Perraut (IPAG, France)
Claudio Zanni (INAF, Italy)

# **Speakers**

Silvia Alencar (UFMG, Brazil)
Andrea Banzatti (Texas State Univ., USA)
Clément Baruteau (IRAP, France)
Myriam Benisty (IPAG, France)
Luke Bouma (Caltech, USA)
Fred Ciesla (Univ. Chicago, USA)
Claire Davies (Univ. Exeter, UK)
Jean-Francois Donati (IRAP, France)
Joanna Drazkowska (Univ. Munich, Germany)
Lucas Labadie (Univ. Köln, Germany)
Geoffroy Lesur (IPAG, France)
Alessandro Morbidelli (OCA, France)
Laura Venuti (SETI Institute, USA)
Claudio Zanni (INAF, Torino, Italy)

# **Organizers**

Martina Angelini (IPAG, France) Jérome Bouvier (IPAG, France) Catherine Dougados (IPAG, France) Titouan Graff (Insight-Outside, France) Karine Perraut (IPAG, France)
